DEBUNKED! Dr. Ebert's Cherry Picked Questions Report DEBUNKED! (He won't dare answer what people really care about)

They also show how much maintenance was neglected over the last 8 years Dr. Ebert has been in charge.

SCHOOL NEWS

Referendum report: Videos show areas of need that can easily Hello community members, ISN'T IT TRUE THAT THE FACILITIES STUDY time, they confirmed that use there. Health they confirmed that use there is the study time. They confirmed that use there is the study time. They confirmed that use there is the study time.

Dr. Ebert your constant spin and lack of honesty is becoming a real problem. Your obvious "advocacy" for a YES vote is illegal, just like your failure to release public records.

Your videos are often inconsistent with the information published in the Architect's Report—

All of these problem areas should have already been fixed during your 8 years as superintendent

Hello community members, Below are additional questions that have been asked by our community.

Please be sure to share this information with as many people as you can, so then people vote on Nov. 5, 2024, they have accurate information. Also, please continue to encourage people to vote! Thanks.

Brad Ebert, District Administrator Kiel Area School District

WHERE CAN I FIND THE SHORT VIDEOS THAT YOU CREATED FOR THE COMMUNITY TO VIEW THAT SHOW THE DEFICIENT AREAS OF KIEL MIDDLE SCHOOL?

Our community has always expected transparency and we believe that by showing the community the actual areas through short video clips, people can see the areas for themselves.

We have created about a dozen videos of some of these areas and nave posted them for viewing. If you go to our Facebook page (Kie Area School District) or our You Tube Channel (Kiel Broadcast Network), you will be able to view all of the videos. We are in the process of creating more of these videos.

ISN'T IT TRUE THAT THE FACILITIES STUDY IDENTIFIED PRIORITY AREAS AT THE OTHER TWO BUILDINGS AS WELL? HOW WILL THOSE AREAS BE DEALT WITH IN THE FUTURE?

Yes, that is true, the facilities study did identify areas that need to be addressed at the other two buildings as well. We have our 10-year maintenance plan/priority list that we work through each year, which prioritizes areas that can be addressed with the money that we do have in our budget. It is also our hip pe that our budget will allow us to continue to increase our building maintenance budget over the years to take care of as many of the it ims that were identified in the facilities study as possible.

IS TRUE THAT THERE IS MOLD AND AGBESTOS IN KIEL MIDDLE SCHOOL? IF ES, HOW IS THE BUILDING CONSIDERED SAFE FOR OUR STUDENTS AND STAFF?

Yes, this is true. Kiel Middle School has mold inside of and/ or behind the walls in some of the classroom areas in the lower level of the building. We know this because over time, we have had contractors come in and suplace areas where the water/flooding damaged some of the areas and they needed to be replaced; at that

time, they confirmed that yes, there is mold behind the walls. Also, we do have piping inside of Kiel Middle School that is "wrapped" in asbestos, which is a product that was used starting in the early 1900s and continued through the time that the Kiel Middle School was built (1928 is when the main area of the middle school was completed). This product has now been considered widely unsafe if disturbed. We do run air quality tests periodically each year to ensure that staff and students are able to continue to use the building.

THE BUILDING WAS COMPLETED IN 1928, BUT WEREN'T THERE ADDITIONS SINCE THEN?

Yes, there were multiple additions to the building over the course of the last 100 or so cars. To view the additions, please go to our website and open the facilitie, study booklet.

HOW ARE CLASSROOMS "TOO MALL", WHEN CLASS SIZES ARE SMALLE THAN PREVIOUS YEARS?

Not all classrooms are too shall. But those that are too small provide challenges with the delivery of instruction and do not allow students with disabilities or other limitations to move easily around the classroom. Some of the Middle school classrooms are in the 600 Square foot range, which we are told is considered very small by those that we work with. The average classroom size for new construction is 900 square feet, we have been told.

I HAVE SEEN IN THE LOCAL PAPER THAT A
COUPLE MEMBERS OF OUR COMMUNITY
CONTINUALLY CRITICIZE EVERYTHING
THAT IS DONE IN OUR DISTRICT, AND NOW
ARE CRITICIZING THE 25 TO 30 FOCUS
GROUP COMMUNITY MEMBERS FOR
THEIR WORK WITH THIS PROJECT. THAT IS
A SHAME. WHY DOES THE LOCAL PAPER
CONTINUE TO PRINT THESE THINGS?
DIDN'T EVERYONE HA E THE CHANCE TO
BE PART OF THE GROUP AND BE PART OF
THE SOLUTION TO THE PROBLEMS AT KIEL
MIDDLE SCHOOL?

Answer: Yes, all community members had the chance to be part of the focus group. The district sent out invitations when the focus group was being formed. We are proud of those community members that participated and helped the district/School Board determine what they believe is the best path forward.

Turn to REFERENDUM/page 7

be repaired!

Don't be niave Dr. Ebert. The contractors tell you that so you will spend \$67,000,000 and they will make millions. Is it true on-site enrollment has been dropping for the last 10 years?

How low you are willing to stoop!
Who's idea was it to have 5 indoor basketball courts to drain energy year after year?
Watching presentations does not quality anyone to reccommend a \$67,000,000 tax hike!

Yes the other two schools need \$35,000,000 in repairs. There is no way to fix them without a \$35,000,000 referendum as well
The School Board is IGNORING this BIG PROBLEM

Yes all old building in America have these issues and they are easily fixed, except in KASD these things never get fixed! Why is that Dr. Ebert?

So you admit pretending the whole building is "old" is just more spin
